COMPUTER SLOW?

BOOTING PROBLEMS?

SOFTWARE CRASHING?

INFECTED WITH MALWARE?

NETWORKING PROBLEMS?

HARDWARE NOT RESPONDING?

Computers are increasingly essential tools for both work and home. But they can be frustrating too ! If your machine is falling below your expectations let **Wensleydale Computer Services** offer a solution.

Hello, I am David Fisher, proprietor of **WCS**. I have over 12 years experience as an IT manager working with the large family of Windows operating systems (XP, Vista, 2000, NT, 98).

I am a Microsoft Certified Professional (MCSE 70-210 Windows 2000 specialty) and I am willing to help you with your computer or networking needs.

WCS repairs and maintains all pc's, networks and peripheral hardware either in the work or home environment. Our services are reasonably priced and specifically tailored to your needs - the initial evaluation is always Free.

Most performance problems can quite often be restored with a little software cleaning-up or a memory upgrade without having to resort to expensive replacement.

We offer on-site pickup and return and will not sign off on the job until you are satisfied with the result.

NETWORKING

☺ Use a Local Area Network to share all the computer and peripheral resources in your home or office.

☺ Share your internet gateway with all your machines; protect them with a firewall; free them to roam using wireless connectivity.

☺ Provide private and secure access to your network from remote clients over the public internet.

We can design and build solutions perfect for your needs... Connect all your pc's, share printers, internet gateways and other resources efficiently and cost effectively. Use wireless LAN's for portable laptop connection. Employ Virtual Private Networking over the internet to connect your remote machines with your main site.

Do you need help with hosting or designing a web site? Run your own web server or use the many commercial hosting opportunities available. Our experience can be seen by visiting the following sites www.ruralspokane.com www.ecor.spokane.com www.otisace.com
